Australian Family Owned Since 2011

ABOUT US

Established in 2011, DCS & DCS Industrial are family owned and operated businesses, headquartered in Mackay, QLD.

Providing one-time maintenance requests, decommissioning plant and infrastructure, routine maintenance days, CHPP, last-minute breakdowns, and planned closure work to a variety of mine sites, industrial workshops, and contracting agents.

Skilled operational and maintenance personnel, who have a years of service experience in the mining and industrial sectors.

Industry leader in Bowen Basin industrial Cleaning.

Supplying a modern fleet, high-risk certified field team (including certified Supervisors and machine operators) and proudly a Queensland approved labour hire provider.

OUR VALUES

D Dedication through our pride in our services and community footprint

C Compassion through our actions in ensuring respect, wellbeing and team pride

S Safety as a mindset not just practices

HEALTH, SAFETY, ENVIRONMENT & QUALITY

QUALITY

DCS' Quality Management Standards outlines how we provide cost effective and efficient services, through continued improvement mindset and initiatives, KPI review and quality control processes, to ensure the highest industry standards, high-performance equipment, and processes.

SAFETY

DCS undertakes continuous risk management in the workplace to ensure the safety of all employees and personnel that we may interact with during our operations.

We embedded our Safety Values across the organisation to show visible leadership towards safety and we perform all our services in accordance with site safety management systems.

HEALTH & WELLBEING

DCS' top priority is the safety of not only our own, but all interacting personnel. Our policies and procedures contain in-depth information on how to maintain a healthy and safe work environment,

DCS' aims to achieve zero workplaces incidents.

Our policies and procedures are continuously being reviewed to ensure we go above and beyond to ensure the safety of employees, contractors and the public.

ENVIRONMENT

DCS understands the importance of the effect we have on the environment, which is why we ensure our Environmental Management Plan (EMP) strictly complies with the highest standards regarding the safe use of environmentally friendly chemicals, and the efficiency of our equipment. We continue to seek the most efficient and innovative practices to reduce our environmental impact, procure from suppliers whom have environmental conscious practices, low emission schemes and products. Whilst working hard to increase employee awareness and how they can contribute to our environmental targets.

DCS MINING & INDUSTRIAL CLEANING

COMMUNITY

DCS are proud to supply employment opportunities in Mackay and the Bowen Basin.

We provide training and development for all skill levels and career pathways and progression opportunities.

We source from an established network of local suppliers to undertake our compliance, safety and purchasing needs.

DCS take pride in supporting local sporting events and community sponsorship, currently sponsoring:

- Major sponsor of Roanld McDonald House Charities
- Mackay City Hawks Inc. – 2021-2025 Mackay AFL seasons
- Local sport events across the Mackay region - Mackay Hospital Foundation - Muscle Garden Charity Run.

We have developed wellbeing presentations and packages with the Charity representatives for our DCS Team available to all the community.

The DCS team participates in R U OK Day and supporting Women in Business. We contribute annual donations to the Australian Red Cross – Bush Fire Appeal, Canteen, FNQ Hospital Foundation, Everyday Hero's, The Salvation Army, Movember, and the Cancer Council.

MINE SITE SERVICES SCOPE OF WORK:

**EXECUTE ALL SERVICES WITH
PRECISION AND EFFICIENCY.**

**Industrial Equipment &
Plant Cleaning for routine
maintenance and
shutdown(s)**

**Specialising in Cleaning
of Draglines and
(Dynavanes), Excavators,
Shovels, & Drills**

Mine Site Cleaning

**Industrial Building & Workshop
Cleaning (Internal/External)**

**Plant Cleaning for NDT Testing
and Maintenance preparation**

Labour (Labour Hire Licence)

Hydro Excavation

Sump and Pit Cleaning

**Laydown Area Cleaning &
Maintenance**

**Certified High Risk Work:
Our Personnel are qualified
in Confined Space, Gas
Testing & Working at
Heights.**

DCS is responsible for all machinery maintenance activities that fall within the scope of works below:

Including High Risk Certified Labour requirements for all your industrial and shutdown preparation needs. Our High-Pressure Water Blast Trucks, EWP Trucks and Vacuum Loading Trucks provide a high-quality service, of which includes:

- **Industrial Equipment & Plant Cleaning for routine maintenance and shutdown(s) inc. Weed & seed, transportation clean downs**
- **Street sign & Billboard cleaning**
- **Jetty surface cleaning/ street sweeping**
- **Plant Cleaning for NDT Testing and Maintenance preparation**
- **Contamination / Disinfectant Cleaning**
- **Industrial Building (External), Workshop Cleaning (External/Internal) & Toilet block cleaning (External)**
- **Laydown Area Cleaning & Maintenance**
- **Sump and Pit Cleaning**
- **Boat Ramps and Walkways Cleans**
- **Office and Crib Cleaning & Disinfection**
- **Hydro Excavation**
- **Labour**
- **Equipment**

OUR FLEET

Our modern vacuum, hot water blast trucks, and hot water blast trailer ensure that we can complete every task in a safe, effective and self-sufficient manner.

Constant maintenance is performed on our equipment and vehicles to guarantee site specific compliance and secure operation. For this reason, our devices provide the greatest benefits in terms of environmental impact, cleaning efficiency, and cost-effectiveness.

We ensure that every vehicle undergoes inspection and complies with the necessary individual site requirements.

High CFM vacuum with two hoses - 25 meters/3 inches 30 meters/2 inches. Capabilities to draw both dry and wet material.

60 meters of hose with high pressure hot water capabilities of 150 degrees, with pressure washing and cleaning at 4000PSI.

4000 liter water tank

DCS21 and DCS123 are custom built Vacuum truck with a nine bag-house pulse injected filtration system for maximum performance in vacuum loading dry material. Years of custom designing, Knowledge and experience has gone into developing these trucks.

OUR FLEET

DCS22 Water Blast Truck (4200Lts) supplies high volume and high-pressure hot water with capabilities of 155 degrees, and pressure washing and cleaning at 3800PSI.

This truck is best suited for:

- Draglines
- Dynavanes

Light Vehicles

Our light vehicles consist of five-star ANCAP Dual Cab Mitsubishi Triton and Toyota Hilux. Each vehicle is fitted with IVMS, toolboxes and PPE kits with a wide range of tools and equipment available to ensure efficient and effective cleaning.

OUR FLEET

TWIN WATERBLAST TRUCK

Our ultramodern Hot Water Blast Truck is fitted with high volume water pump with two pressure washer units and holds 8000L of water. Each unit supplies 15Lts per minute of water at 3800PSI.

This truck is best suited for:

- Draglines
- Drills
- Dynavanes
- Excavators

QUAD WATER BLAST TRUCK

Our Quad Water Blast Truck consists of two pressure washer units, each unit containing two gurneys each. DCS11 has a 13,000L water tank, each unit supplying 17Lts per minute at 3800PSI. DCS11 also includes a foaming system and a high-volume pump which can be adjusted to low volume for more fragile areas of machinery.

- This truck is best suited for:
- Drills
- Draglines
- Dynavanes
- Excavators
- Shovels

Waterblast Unit Highlights

- 13,000 L poly tank with approximately 10,850 kg water load.
- 4 x hose reels, 4 x pumps and 4 x boilers integrated into the build.
- Tray rated 1,850 kg plus dunnage box 100 kg.
- Purpose-built layout to support safe, efficient excavator and drill cleaning operations.
- High-volume, low-pressure pump to support rapid water transfer and high-volume washdown applications.
- Dual 20L chemical cradle with integrated foaming gun.

Base Vehicle & Performance

- Isuzu FXY 260-355 6x4 truck platform.
- 259 kW power @ 2,000 rpm and 1,437 Nm torque @ 1,400 rpm.
- Allison 4430 GEN 6 automatic transmission.
- 6,300 mm wheelbase with OEM front axle rating of 7,300 kg and rear axle rating of 20,000 kg.

Main Dimensional Highlights

- Overall length (OAL): 11,123 mm
- Body length (BL): 8,100 mm
- Cab to axle (CA): 5,624 mm
- Rear overhang (ROH/BROH): 3,076 mm
- Body height (BHT): 1,800 mm

Safety & Additional Features

- Fully remote-controlled pump operation with remote emergency stop.
- Travel safety warning system – alerts if toolboxes are open or the light mast remains raised.
- Pressure warning strobes – indicate when high-pressure hoses are live.
- Dual vehicle E-Stops – in-cab and external emergency shutdown.
- Dedicated lance storage & harness drying provision.
- ROPS fitted & certified.
- Battery & starter isolation with lock-out provisions.
- Park brake & seatbelt audible/visual alarms.
- Reverse camera & reverse warning alarm.
- RPEQ engineered stability certification.
- Burst-sleeved pressure hoses to mining standards.

Night Operations

360° Retractable Light Mast

Four-sided LED lighting provides powerful onboard illumination for night-shift and low-light operations, improving visibility around equipment, work zones and access points while supporting 24/7 cleaning capability.
